

RESEARCH & DEVELOPMENT TAX CREDIT SERVICES

A Pathway to Tax Savings Through Innovation

Helping our clients
achieve **TAX SAVINGS**,
one activity at a time.

RESEARCH & DEVELOPMENT TAX CREDIT SERVICES

Did you know Research & Development expenses for your business may qualify as a nonrefundable tax credit? If your company performs any of the following activities, such as, developing a new product, building prototypes, solving a product or process issue, improving a process, providing engineering services, or developing software, you may qualify for the R&D Credit, directly reducing the amount of tax owed to the Internal Revenue Service.

Research & Development can occur at any level inside an organization and is often overlooked from an accounting perspective. This credit is available to organizations operating in a wide range of industries, providing a significant opportunity for savings to be passed back into your business for continuation of growth and strategic development.

>> While the calculations and qualifications can be rather complex, our professionals are passionate about helping you take advantage of incentives that directly impact your bottom line.

OUR SOLUTION

Recognizing the underutilization of this tax credit, the Dopkins R&D tax team has put together a program that accomplishes three tasks: **EDUCATE**, **CAPTURE** and **CLAIM**. We use our knowledge to work directly with your team, maximizing the credit based on your company's unique activities.

Dopkins

R&D

TAX

SERVICES

EDUCATE: We'll help you understand what activities qualify, how the credit applies to your specific tax situation, and where it may be limited.

CAPTURE: We'll help you establish methods to capture and document the costs related to each qualifying activity.

CLAIM: We'll prepare workpapers and forms that provide the maximum credit and the proper supporting documentation.

EDUCATE. CAPTURE. CLAIM.

with Dopkins Research & Development Team
